

! TELESCOPIC RAIL INSTALLATION GUIDE !

If your item comes with a **TELESCOPIC GLIDES**, the following information is **CRITICAL** to ensure that you will be able to properly install the Glides and have properly aligned and working drawers.

This **QR Code** will lead you to a **YouTube Video** That will Demonstrated all the information found in the Telescopic Installation Guide

A Youtube search using the following will also lead you to the Telescopic Installation Guide

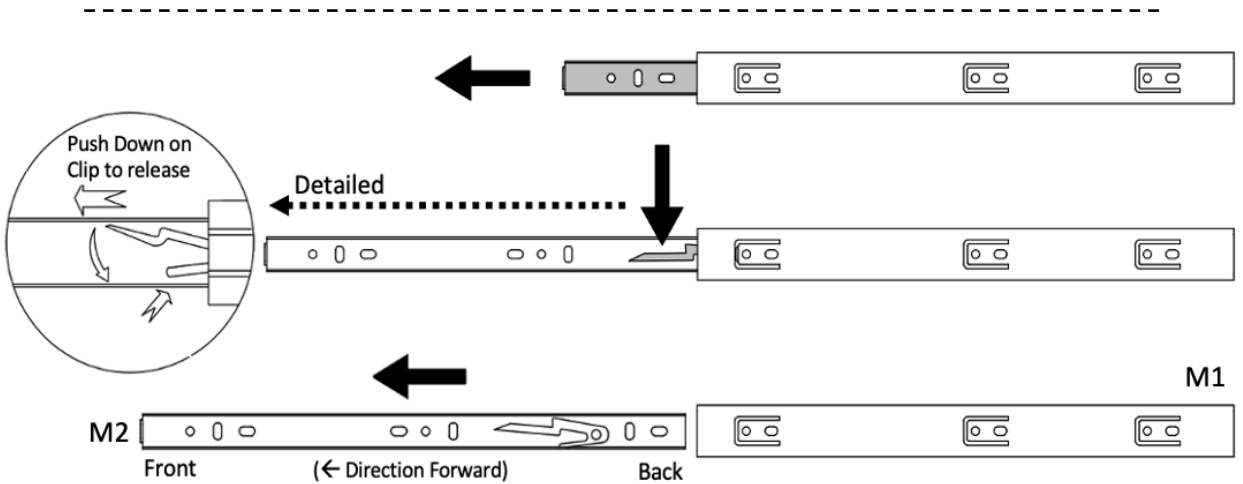

“ K1 INTL RAIL GUIDE “

Section I – Separation of the Drawer Glide

The Telescopic Glide (Part M) comes **Pre-attached**; Each **Part M** must be separated into Two Parts (**Part M1 & M2**).

- Part M1 gets attached to the Side & Middle Panels of the Furniture
- Part M2 gets attached to each side of the Drawer.

View upon unboxing the Drawer Glides

Section II – (Part M2) – Drawer sides glide installation

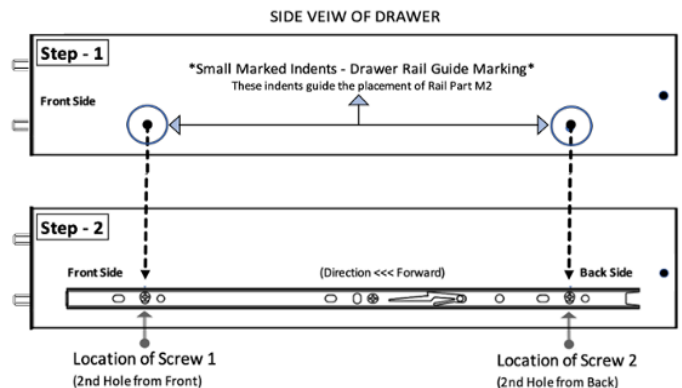

➤ The side of each Drawer comes with small-marked indents to properly Align Part M2

➤ Please see the diagram for the correct Orientation and Placement of Part M2 and the Screw location.

Step 1 – Locate the small-marked indents (Dimples) on the Drawer Side

Step 2 – Attached the M2 Rail to the Side of the Drawer with screws located in Diagram →

**** Note** the forward direction of part M2

Section III – (Part M1) – Side & Middle Panel Glide Installation

- When Attaching **Part M1** to the Side/Middle Panel, Please ensure that **Part T** (Retractor) is not 1st required.
- Please see the assembly manual on how **Part T** is attached.
- If you item **does not have Part T**, then please see **Diagram-A** below.
- Once **Part T** is attached, Rail Part M1 can ne installed, Please see **Diagram-B** below.
